Jim Lam

Test Analyst | VP Missions, Peryton Space
jim.sebastian.lam@gmail.com | jl03093@surrey.ac.uk
linkedin.com/in/jim-l-3154a0102 | github.com/sebastianlam | sebastianlam.github.io

SKILLS

Python, C, C++, CUDA, Java, SQL, Shell, JavaScript/TypeScript, Next.js, Git; testing and verification; AWS (EC2, S3); computer vision (YOLO, AprilTags); Clojure; Flutter / iOS; PHP, jQuery, Vue.js, MySQL

Languages: English (IELTS 8.5), Cantonese (native), Mandarin (fluent), German (intermediate)

EDUCATION

University of Surrey - BSc (Hons) Computer Science with Professional Training Year — Sep 2023 - Aug 2027
Guildford | Year 1: 86.13% | Year 2: 75.5% | Professional Training Year (PTY)

EXPERIENCE

Fime - Test Analyst — Sep 2025 - Present
Intern (full-time) Sep 2025 - Sep 2026; Test Analyst (part-time) Sep 2026 - Present. Guildford, on-site.

- Type Approval campaigns for EMVCo Contact Level 2 (EMV L2) and Contactless kernels (VISA/AMEX). Also card testing per PURE and CCD.
- Wrote custom scripts that parse vendor-locked tool logs into the reporting docs we need. Built a local LLM PDF spec parser that uses fewer tokens than pypdf.

Peryton Space - VP Missions; Team Lead and TT&C (UKSEDS SDC) — Sep 2024 - Present

- VP Missions (May 2026-): mentor non-rocketry competition teams (Olympus Rover, Satellite Design, Airbus Space). Migrated the society site from WordPress to Cloudflare.
- Team Lead and TT&C Lead, Satellite Design Competition (Sep 2025 - Jul 2026): 3U CubeSat lunar simulation with stereoscopic computer-vision depth maps. Ran ECSS (European Cooperation for Space Standardization) PDR/CDR. Finished 6th of 20 nationally.
- Previously TT&C (telemetry, tracking and command) and Payload Lead (Sep 2024 - Jul 2025). Best Innovation Award (Airbus Defence and Space, Stevenage). AprilTags CV navigation with attitude/orbit control, link margin under mass/budget, low-latency video, Next.js + C++ ground station.

Sports Vision - Computer Vision Lead — 2023 - 2024
YOLO snooker scoring system. Custom annotation tool in PySide6. Synthetic data via Blender Python API.

Next Token Solutions - Software Developer — Oct 2020 - Jan 2023

- Finmonster fintech SME loan-matching platform. AWS shell automation. Stack migration across PHP, jQuery, Vue.js, Clojure, MySQL, S3, Apache on EC2.
- Flutter and native iOS (legacy React Native migration). Client requirements and proposals.

CERTIFICATIONS

freeCodeCamp Responsive Web Design (May 2022) and JavaScript Algorithms & Data Structures (Jun 2022). SETsquared IKEEP Intrapreneurial Training Award (Mar 2025).

PROJECTS

DrunkGPT - CLI LLM client with voice interface, built when OpenAI opened the public GPT-3.5 API.
URL+ - Contributor to ClojureScript Logseq plugin (URL fetch, dictionary-style definitions).
peryton.space - Peryton Space society site, rebuilt from WordPress onto Cloudflare.

INTERESTS

Bouldering (V7/7A+), debating, piano, flight simulation.
